The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9,10,14 and 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by G.B. pat.'855 to Miller.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miller in view of Van Patten. Miller shows the claimed system with the exception of the clip. Van Patten shows a line with a clip 14 for forming a loop for anchoring the line. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the rope line 1 of Miller with a clip, as taught by Van Patten, to form a loop with his line.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miller in view of Ascherin et al. Miller shows the claimed system with the exception of the smaller line coupler. Ascherin shows a sliding rope coupler 90

having a smaller diameter than a larger supporting line 50. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Miller for his standing line to comprise a larger diameter than his rope coupler 6, as taught by Ascherin, to enable a stronger standing supporting line.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miller in view of Wagner. Miller shows the claimed system with the exception of the belt harness. Wagner shows a belt harness. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Miller with a belt harness, as taught by Wagner, to enhance support around a user's waist.

Applicant's arguments filed 10/24/06 have been fully considered but they are not persuasive. Applicant argues that Miller does not anticipate the claims as stated above because Miller's Prusik Hitch is not used for resisting a fall. The examiner disagrees. It is noted that Miller teaches all the claimed elements, applicant has not pointed out any claimed element not taught by Miller, and his Prusik Hitch is used to freely move along his standing rope when a load is not applied thereto and progressively tightens (such is an inherent feature of a Prusik Hitch) upon the standing rope when a load is applied thereto as in the case of a fall by the user thereby providing a progressive braking action (note page 4, lines 15-24). Thus

Millers meets all the requirement of 35 U.S.C. 102 and therefor the above applied to claims are properly anticipated by Miller.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
